23d Street.

BOY BURIED BY A CAVE-IN.

collapse of an old Oven Under the Sidewalk
in Hester Street.

Samuel Wechsler, 10 years old, of 43 Hester
Street.

BOY BURIED BY A CAVE-IN.

and three companions were at play. The building at this number was torn down recently to make room for a new park. Since the park was recently out of ground, the sidewalk has been laid on the ground for the benefit of the neighborhood. The old oven has done duty for everything from a bandit's treasure cave to a prison cell.

Recently the boys have been taking out the bricks of the oven in order to enlarge the space. Besides the Wechsler boy, Julius, and Bernard, who were the first to dig, the Henk and Moe were engaged in pulling out the bricks at half past six yesterday afternoon.

But at half past seven the oven gave way, burying Samuel almost completely and Julius Chodnicki and Henry Wechsler. The boys and their father, who were working on the oven, succeeded in extricating his brother, and a man who gave him his name as Moses Farmer dug out the Marks boy with his bare hands.

Policeman Higgins, who was on post, and Policemen Gorman and O'Connell, who were called for ordinance work, all of the Eldridge street station, arrived at this time, and the three boys ran away. The policeman could see only the Wechsler boy's feet protruding from

ly the Wechsler boy's feet protruding from under about three feet of bricks and earth at the base of the wall. One

W. J. Williams, the boy was uncovered and removed to the sidewalk. The only thing that saved his life was the fact that the big flagpole fell so close to a small air space about six inches from the boy's head. As it was, he was unconscious. The policeman followed the directions for resuscitation and the boy was taken to the hospital. He was taken to the Gouverneur Hospital, where he was reported to be doing well later.

DEATH WITH RUBBER HOSE.

The Mother Arrested, Though the Son Said He Deserved What He Got.

Mrs. Mary Worth of 26 Hector street was accused in the homicide case of the court yesterday of beating her 10-year-old son Phil with a piece of rubber hose about three feet long. Phil was in court. His head was covered with bumps, and Agent King of the Gerry society said that on his body were bruises and welts.

The boy was, nevertheless, unwilling to testify against his mother, and the case went to court proceedings.

Phil fell on the sidewalk, Carlisle and Williams said Friday. He was carried to the Judson Street Hospital, where Surgeon Rodman found that he was suffering from a beating, lacerations, lacerations, and bruises. He was notified, and Agent King called at Phil's home.

He began to question Mrs. Wirth, and she grew defiant.

broughted to take poison and kill himself, so I threatened him over the head with a broomstick and told him if he didn't get up right now I was going to do about it."

Agent Smith arrested Luther H. Williams, a white child, who said his father, Jimmie Williams, admitted that he had threatened to kill himself because of the whippings he received.

The case was taken to the Federal Court by the merry society and held Mrs. Wirth in \$200 bail or trial at Special Sessions. Mrs. Wirth has three children, and of these the neighbors also charge.

Stricken with Death While Running to a Train.

NEW BRUNSWICK, N. J., Feb. 12.—Frank E. Stevenson, who lived at 210 Townsend street, his city, died of heart failure while running to train this morning. Mr. Stevenson was trying to catch the 7:27 train of the Haritan River Railroad, which leaves for New York City at 8 o'clock as general superintendent of Milton A. Edgar's clay pits. At the corner of Townsend street, where the railroad crosses the highway, he fell, and when help arrived he was dying. He was 69 years old, married, and had two sons. His wife and one daughter also lived here. He was once assessor of South Brunswick township, and was well known as a Democratic politician.

Parsons Memorial Schoolhouse Formal

Accepted.
HARRISON, N. Y., Feb. 12.—The Board of Education of this village to-day formally accepted from John E. Parsons of New York a \$30,000 schoolhouse given by him to the town. The building is of granite, handsomely trimmed and furnished, and will accommodate 200 scholars. It was erected in memory of Mr. Parsons's three children—Edward Lamb Parsons, Catharine Melvane Parsons, and Reed Melvane Parsons—all of whom died in infancy. Mr. Parsons has country homes in Rye and in Lenox, Mass., where he recently gave a handsome chapel as a memorial to his wife.

The man who goes to find the North Pole must be strong, and brave, and healthy. His is a dangerous and health-trying task. His nerves must be steady to keep his vessel from wreck. His blood must be pure and rich to withstand exposure and fatigue.

These things are equally as important to the man who stops at home and works, for death and disaster are not confined to the Arctic regions. Steady nerves, pure blood and healthy vigor are essential to health and success anywhere in the world. Thousands of men do not seem to realize this and go about half alive and miserable just for lack of a little of the proper medicine. Dr. Pierce's Golden Medical Discovery is designed to help them. It is a blood vitalizer—a nerve strengthener. It should be taken by every man or woman who is not exactly as well, and vigorous as he or she ought to be. It produces strong, sound, solid flesh—brings springiness back to the step—brightness to the eyes—cheerful-

ness to the mind. No medicine in the world ever had such a wonderful record.

of success.

Wm. Smothera, Esq., of Millston, Jackson Co., Wis., writes: "I wish to say that Dr. Pierce's Golden Medical Discovery is the best medicine for the Grip that I have ever tried. I was cured twice with it when I could not get any other relief."

Dr. Pierce's Pleasant Pellets regulate the liver, stomach and bowels.
